## 02 QR Use Guide

### Method A:

- Align the 6 ball bearings on the wheel QR with the 6 notches on the base QR mount.
- Press the quick release onto the base mount, keeping the bearings and notches aligned.
- The quick release will automatically lock into place; if it doesn't, then remove it, recheck the alignment and try again.
- To remove the wheel, squeeze the black quick release part with the MOZA logo towards the wheel with both hands and pull out the wheel at the same time.

### Method B:

- Rotate the wheelbase until you locate the arrow directly above the base.
- Center the wheel and attach it to the wheelbase.
- To remove the wheel, use both hands to squeeze the black quick release part with the MOZA logo towards the wheel with both hands and pull out the wheel at the same time.

### 03 Adjusting the Shifter Paddle Position

Loosen the two shift paddle screws with a hex wrench, adjust the paddles outward to your desired position and tighten the screws securely.

### 04 Steering Wheel Configuration

The steering wheel can be set conveniently and quickly in the MOZA Pit House Software.

- Clutch paddle modes: Can be set to composite axis, independent axis, or button.
- Button combinations: click on the button combination tab on the upper right corner of the steering wheel page to show a list of button input numbers and programming input combinations.
- Brightness adjustment: The brightness of the buttons are adjustable.
