02 QR Use Guide

Method A:

- Align the 6 ball bearings on the wheel QR with the 6 notches on the base QR mount.
- Press the quick release onto the base mount, keeping the bearings and notches aligned.
- The quick release will automatically lock into place; if it doesn't, then remove it, recheck the alignment and try again.
- To remove the wheel, squeeze the black quick release part with the MOZA logo towards the wheel with both hands and pull out the wheel at the same time.

Method B:

- Rotate the wheelbase until you locate the arrow directly above the base.
- Center the wheel and attach it to the wheelbase.
- To remove the wheel, use both hands to squeeze the black quick release part with the MOZA logo towards the wheel with both hands and pull out the wheel at the same time.

03 Steering Wheel Configuration

The wheel can be set up quickly and easily using MOZA Pit House software.

- Clutch paddle modes: Can be set to composite axis, independent axis, or button.
- Button combinations: click on the button combination tab on the upper right corner of the steering wheel page to show a list of button input numbers and programming input combinations.
- Brightness adjustment: The brightness of the buttons are adjustable.
- Select Dash Display Screen UI: Hover over the screen UI to reveal a play button. Click it to choose that UI design.
- Edit Digital Dash Display UI: Hover over the screen UI to reveal an edit button. Click it to edit the display UI. For advanced customizations, access the Dash Display Screen UI Editor in the MOZA Pit house.
